

25 Ways to Save Fuel and Money

As of March 31, 2022, the average national price for a gallon of regular gasoline touched \$4.25, according to AAA. As your wallet informed you, this is some of the highest prices ever, and that's not even taking inflation into account. What about the cost for diesel? That's over \$5 per gallon, and yes, that's also shattered records. Despite this, many of us still rely on our vehicles to commute to work or run errands, and regardless of the record-breaking prices, road trips remain popular.
